

Why it Works...

The secret to the success of the Purr...fect Fence System is the poly mesh grid. Although very strong, it is also quite flexible. This flexibility is what keeps most cats from even attempting to climb it. For more agile cats, the laws of gravity deter them if they somehow make it near the top. Because each post is topped with an arched support that turns the fencing downward at an angle, cats are kept from climbing further because they are turned upside down and back toward the ground.

Easy Installation...

Our galvanized *Post Inserts* eliminate any digging or the need for a ladder. The inserts are first tapped into the ground with a sledge hammer and "driving cap" (included) and then the posts are just slipped inside. *Ground Stakes* pin the bottom of the fence to the ground every two feet so cats can't squeeze under. These galvanized steel "pins" have a kinked shaft so they won't pull out of the ground.

Purr...fect Fence requires little to no maintenance even years after being installed. The majority of the components can also be re-used should you decide to move.

Happy Customers...

"We love our Purr...fect Fence. forty cats have not even attempted to climb it, as it provides a visual deterrent as well as an unstable climbing surface. We now eat lunch outside with the cats and it gives everyone a break and makes it a lot less crowded in our facility. The cats enjoy being outdoors so much that we have to entice

them with food to get them back inside! We feel at ease with them being outside, even with a busy road close by. We strongly recommend Purr...fect Fence."

Dixie Dixon~ Kitty Cottage - Blue Bell, PA

Dr. Lynne Riley, DVM - Salem County, NJ

"When we moved to our new home four of our cats started to spray in the house. They have had Purr...fect Fence for a year now and have never escaped. We love the fence as it blends into the landscape. We are happy and our cats are happy! Life is good!"

"Your Purr...fect Fence is indeed "Houdini-proof" – no escapes – the cats love it. We are now able to enjoy an evening on the patio without listening to the guilt-provoking meows of the rest of the family stuck inside the house. We are all experiencing much less stress, worry, and now have freedom. Thank you in equal parts from the humans and all the felines in our family!"

Elena Caravela & Family

Our Company...

Purr...fect Fence is a family owned and operated national mail order company that has evolved from Benner's Deer Fencing systems. The same high-strength and long-lasting material utilized for Purr...fect Fence has been used for 15 years to keep deer out of gardens and landscaping.

Since the transformation to a fence system designed specifically for cats four years ago, Purr...fect Fence has experienced rapid expansion. Now many thousands of cat owners, shelters and animal care professionals utilize our product with unprecedented results. Our goal is to continue to improve our system, expand our product line, and most importantly, enhance the lives of cats.

Located in southeastern Pennsylvania, we ship direct nationwide. Order Purr...fect Fence today and find out why so many people describe our product as a "Life-changing" experience.

We offer professional installations in certain regions of the U.S. – please call for details.

Now also stocking in the UK/Europe. For easy online ordering, questions, and to learn more about how your cat can enjoy the purrfect balance between safety and happiness, visit our website.

Finally cats can safely enjoy the outdoors...

The Purr...fect Fence Cat Fencing System is the first complete, free-standing cat fence that safely keeps cats within a designated area. Now even escape artist "Houdini" cats can enjoy the great outdoors without you worrying about their safety. When installed properly, there have been no confirmed escapes, even with well over ten thousand cats safely protected so far.

Happy & Healthy Cats...

Purr...fect Fence is the product of choice for discriminating cat owners that recognize the many physical and psychological health benefits that access to the outdoors offers their cats. *A recent veterinarian survey*

cited obesity as the greatest health issue facing America's 75 million cats. Purr...fect Fence helps by allowing cats to explore and play outside. The change of scenery associated with being outdoors in a safe

Existing Fence? Look closely, Purr...fect Fence can discretely go right in front

environment can also significantly enhance the overall quality of your cat's life. Like people, cats enjoy a balanced lifestyle, and when happy, are usually healthy too.

Stress Reducer: In a multi-cat household, territorial issues and stress can be significantly reduced if cats have access to the outdoors.

A whole new world in a safe environment...

Cats love to roam and play outside. They also benefit from an outdoor living area, as it provides a pleasant change to the limited space found indoors.

If, however, cats are not kept within a secure environment, then they could be at risk of being trapped by neighbors, struck by a vehicle, or coming in close contact with other cats, dogs or a variety of wild animals.

A Happy Cat...A Virtually Invisible Fence

Purr...fect Fence Benefits:

- Peace of mind that your cat(s) are safe & secure
- Happier & healthier cats
- Minimal visual impact to your property

Because Purr...fect Fence is so affordable and easy to install, some of our clients use the product to enclose their properties. Alternatively, many customers choose to create smaller backyard enclosures for their cats.

The 7' tall fence is a two part system. The upper section is constructed from 7.5 feet of UV stable polypropylene mesh grid that arches up and attaches to the angled extenders. The lower portion (2 feet) is a rodent-proof, powder coated steel mesh that matches the upper section. Both these materials get attached to the vertical support pipes. All materials are black so that the enclosure disappears into the background.

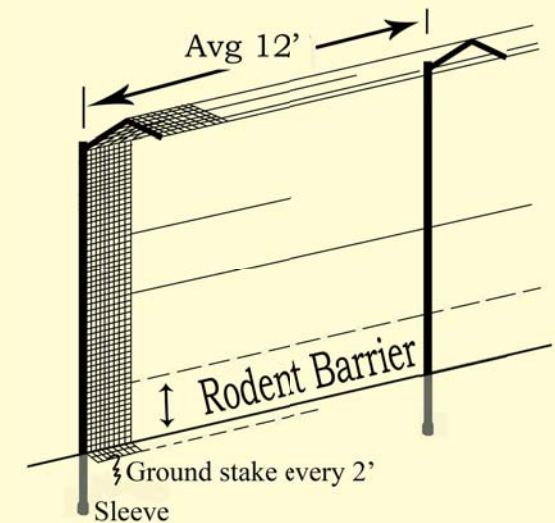

A complimentary instructional DVD and diagrams detailing proper installation are also included with each order.

Each 100 foot Purr...fect Fence system includes everything you need to easily create an all but invisible, extremely safe, cost-effective enclosure for your cat(s).

3' wide "saloon door" Access Gate

Virtually invisible yet incredibly strong, our cat fencing will keep your cat(s) safe and secure within any designated area. Now with Purr...fect Fence there is no need to try and retro-fit an unsightly and expensive conventional fence.
